SURVEY COMPLETION DATE: 04-22-2016

Many years of research conducted by The Gallup Organization suggest that the most effective people are those who understand their strengths and behaviors. These people are best able to develop strategies to meet and exceed the demands of their daily lives, their careers, and their families.

A review of the knowledge and skills you have acquired can provide a basic sense of your abilities, but an awareness and understanding of your natural talents will provide true insight into the core reasons behind your consistent successes.

Your Signature Themes report presents your five most dominant themes of talent, in the rank order revealed by your responses to StrengthsFinder. Of the 34 themes measured, these are your "top five."

Your Signature Themes are very important in maximizing the talents that lead to your successes. By focusing on your Signature Themes, separately and in combination, you can identify your talents, build them into strengths, and enjoy personal and career success through consistent, near-perfect performance.

---

## Achiever

Your Achiever theme helps explain your drive. Achiever describes a constant need for achievement. You feel as if every day starts at zero. By the end of the day you must achieve something tangible in order to feel good about yourself. And by "every day" you mean every single day—workdays, weekends, vacations. No matter how much you may feel you deserve a day of rest, if the day passes without some form of achievement, no matter how small, you will feel dissatisfied. You have an internal fire burning inside you. It pushes you to do more, to achieve more. After each accomplishment is reached, the fire dwindles for a moment, but very soon it rekindles itself, forcing you toward the next accomplishment. Your relentless need for achievement might not be logical. It might not even be focused. But it will always be with you. As an Achiever you must learn to live with this whisper of discontent. It does have its benefits. It brings you the energy you need to work long hours without burning out. It is the jolt you can always count on to get you started on new tasks, new challenges. It is the power supply that causes you to set the pace and define the levels of productivity for your work group. It is the theme that keeps you moving.

---

## Restorative

You love to solve problems. Whereas some are dismayed when they encounter yet another breakdown, you can be energized by it. You enjoy the challenge of analyzing the symptoms, identifying what is wrong, and finding the solution. You may prefer practical problems or conceptual ones or personal ones. You may seek out specific kinds of problems that you have met many times before and that you are confident you can fix. Or you may feel the greatest push when faced with complex and unfamiliar problems. Your exact preferences are determined by your other themes and experiences. But what is certain is that you enjoy bringing things back to life. It is a wonderful feeling to identify the undermining factor(s), eradicate them, and restore something to its true glory. Intuitively, you know that without your intervention, this thing—this machine, this technique, this person, this company—might have ceased to function. You fixed it, resuscitated it, rekindled its vitality. Phrasing it the way you might, you saved it.

---

## Harmony

You look for areas of agreement. In your view there is little to be gained from conflict and friction, so you seek to hold them to a minimum. When you know that the people around you hold differing views, you try to find the common ground. You try to steer them away from confrontation and toward harmony. In fact, harmony is one of your guiding values. You can't quite believe how much time is wasted by people trying to impose their views on others. Wouldn't we all be more productive if we kept our opinions in check and instead looked for consensus and support? You believe we would, and you live by that belief. When others are sounding off about their goals, their claims, and their fervently held opinions, you hold your peace. When others strike out in a direction, you will willingly, in the service of harmony, modify your own objectives to merge with theirs (as long as their basic values do not clash with yours). When others start to argue about their pet theory or concept, you steer clear of the debate, preferring to talk about practical, down-to-earth matters on which you can all agree. In your view we are all in the same boat, and we need this boat to get where we are going. It is a good boat. There is no need to rock it just to show that you can.

---

## Responsibility

Your Responsibility theme forces you to take psychological ownership for anything you commit to, and whether large or small, you feel emotionally bound to follow it through to completion. Your good name depends on it. If for some reason you cannot deliver, you automatically start to look for ways to make it up to the other person. Apologies are not enough. Excuses and rationalizations are totally unacceptable. You will not quite be able to live with yourself until you have made restitution. This

conscientiousness, this near obsession for doing things right, and your impeccable ethics, combine to create your reputation: utterly dependable. When assigning new responsibilities, people will look to you first because they know it will get done. When people come to you for help—and they soon will—you must be selective. Your willingness to volunteer may sometimes lead you to take on more than you should.

---

## Analytical

Your Analytical theme challenges other people: “Prove it. Show me why what you are claiming is true.” In the face of this kind of questioning some will find that their brilliant theories wither and die. For you, this is precisely the point. You do not necessarily want to destroy other people’s ideas, but you do insist that their theories be sound. You see yourself as objective and dispassionate. You like data because they are value free. They have no agenda. Armed with these data, you search for patterns and connections. You want to understand how certain patterns affect one another. How do they combine? What is their outcome? Does this outcome fit with the theory being offered or the situation being confronted? These are your questions. You peel the layers back until, gradually, the root cause or causes are revealed. Others see you as logical and rigorous. Over time they will come to you in order to expose someone’s “wishful thinking” or “clumsy thinking” to your refining mind. It is hoped that your analysis is never delivered too harshly. Otherwise, others may avoid you when that “wishful thinking” is their own.
